

**Moneybag's
Guide To Make
\$100+ CASH Everyday**

Disclaimer

This report was written to provide information to help you understand how to some people make money. If you are going to attempt anything in this guide you are attempting it on your own behalf. This was written for educational purposes only.

Hey, how's it going ? First off, I just want to thank you, the buyer, for purchasing this eBook. I can guarantee you this is one of the most original and easiest methods of obtaining CASH directly. Now, with that said, this method is also extremely blackhat. Meaning it is completely against the law in every way. What if I told you there was a way where people would give you cash in person and it would be physically impossible for anything to be traced back to you ? Well, there is.

With this method, you can literally get people to hand over money to you and never have to worry about seeing them again. By now you are probably extremely curious about how we could do something like this. Well, this is where social compliance comes in my friend. With this method I'm going to use Krispy Kreme because there is one around my area, but there are many places you could choose to use something like this.

Ok, step one. We need a fake name. I have chosen the name "Mike Fields". Sounds pretty legit to me. Once you have got your new name picked out you need to head on over to "www.krispykreme.com" Once you get there click on "Fund-raising" on the left side. Once Fund-raising has been clicked click on "Fund-raising Forms" at the top. Once completed choose your country, U.S. or Canada. Then click the PDF icon for "Fund-raising Certificate Pre-Selling Form".

Now, we need a fake cause. For me, since I'm still in high school, I chose ROTC as my cause for the fundraiser. But, you can make up anything you want. Another example would be a fundraiser for a church organization. Scroll down the PDF file until you see the form. Where it says "Your Teacher/Sponsor Here" highlight that and delete it and then enter any legit sounding name. Then where it says "Your Name Here" put in your fake name that we came up with earlier. For me it was Mike Fields. Then, where it says "Your Organization Here" put your school or church or whatever place it may be that the "fundraiser" is taking place at. So, I would put my school name here. At "Purpose Of Sale" put whatever the cause of the fundraiser is. Whether it be ROTC, a church organization, anything. Then, where the "\$" sign is put however much money next to it that you want to make off of each house you goto. A good number that gets a ton of sales for me is \$5. Finally, print out both of the sheets and staple them together.

Now, I haven't really explained what this "fundraiser" of ours is. Basically what you're going to do is, goto a neighborhood around yours. **DON'T DO THIS IN YOUR OWN NEIGHBORHOOD.** When you go to a different neighborhood just start going to every single door. I usually start like this, "Hello, my name is "insert fake name here" and I goto such and such highschool/church." "Basically, we're doing a fundraiser in which you can donate \$5 and

get a certificate for a box of Krispy Kreme doughnuts." "So, not only are you helping a great cause by donating but you also get a box of doughnuts for your contribution." So, right there you have laid everything out on the table for them. So, then they can choose to donate or not. 90% of the people donate. I mean seriously think about it, they think they are helping a school or church and they think they are getting a box of doughnuts for cheaper than they would if they bought it at the actual retail store. Who wouldn't be wanting to donate ? But, don't worry if they don't ! People are bound to say no, but guess what ? It doesn't matter, you only wasted a few seconds of your time by going to that one house.

Now, the closure of the deal. You really do need props. Of course, bring along your stapled together forms. Bring along a pen and be holding the pen. Also, a great prop to bring is an envelope. Once they do give you the cash you want to make it look like it's going to a legit source instead of your wallet, so put it in an envelope that is labeled "DONATIONS" in big letters. Once, they agree to donate immediately do this. It has worked perfectly for me when I have done exactly this. Offer them your pen and tell them to write down their name and address where it is labeled "Customer Name and Address". Then fill out the "Number Purchased" and "Amount Collected" fields for added authenticity. You're probably wondering well, what do I do about the certificates ? Nothing. You do this. While they are writing down their name and address tell them "They said the shipment for the certificates comes in "say date of the next day". For instance. If today was March 3rd. I would say, "They said the shipment for the certificates comes in March 4th." "Which is tomorrow". "So, I have to run them by all these addresses then." "Will you be at home the same time tomorrow?" If they say "No". Then figure out a place to "leave the certificates outside of their house somewhere."

Quick Tip ! For added authenticity, prewrite like 3 names and addresses so it won't be hard to get the first customer of the day. because they will see other names on it and subconsciously feel more safe giving you money.

That's basically it. Just keep going to different neighborhoods collecting money and never see the people again. Like I said, it is extremely blackhat, but there is no real way for it to be tracked back to you and I don't think anyone will fret over \$5. If it ever did come back to you say you turned the money in to the school/church and they haven't got the certificates yet. All quotes are just things that have worked for me when I said them for ultimate legitimacy. Also, Krispy Kreme doesn't have to be used. I'm sure there are many other companies that do things like this. Well, that's all. I hoped you enjoy this eBook. Now get out there and make some money !
